

SELA PRODUCT #2

INDIRECT LIGHTING

Indirect lighting is a form of ambient lighting where the light source is not visible. Indirect lighting minimizes shadows and reflected glare. It is a great source for adding more lumens to a room without creating harsh effects of adding additional direct lighting solutions.

Lumis

Comfort . Design . Moodlighting

Lumis panels are used as lighting sources and can be integrated in tables, shelves, ceilings and window panels.

They can also be used as backlighting sources for mirrors and logos.

Available in WHITE and RGBW, Lumis is the perfect light source for an unique light installation by enhancing the feel of openness and free space in the aircraft.

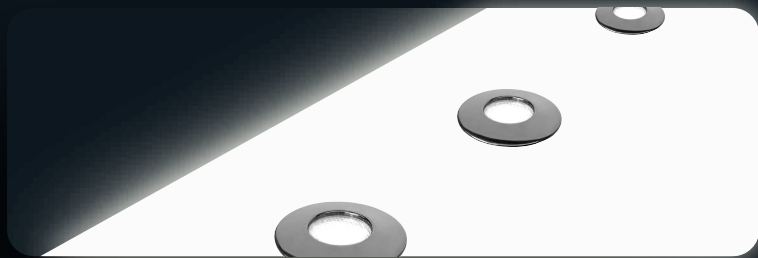

Flat Lumis

RGBW
